

Cooper Veterinary Clinic Pre-Anesthesia Consent Form

Your pet is in for anesthesia/surgery and should do fine, although no procedure can be guaranteed. We will perform a physical examination on your pet before administering the anesthesia. However, **WE HIGHLY RECOMMEND A PRE-ANESTHETIC BLOOD PROFILE FOR ANIMALS UNDER 6 YEARS OF AGE TO BE PERFORMED FOR THE PURPOSE OF ASSESSING YOUR PET TO BE IN A LOW RISK CATEGORY DURING ANESTHESIA. WE REQUIRE A COMPREHENSIVE BLOOD PROFILE AND INTRAVENOUS FLUIDS FOR ANIMALS OVER 6 YEARS OF AGE.** These tests are similar to those your own physician would run on you to undergo anesthesia. By performing this very important pre-anesthetic blood profile, it will help us rule out most PRE-EXISTING PROBLEMS which may not be evident upon the aforementioned physical examination but which could lead to serious complications, including death. In addition, the results of these tests will serve as reference values for future use should your pet become ill. If said test shows a need for other procedures we will then proceed to try to contact you, if you are unavailable then we will proceed with the necessary precautions for the optimum health of your pet. You will be responsible for the costs of any other tests or procedures performed.

Due to growing concerns of Post-Operative pain in animals, we have decided to include a pain injection prior to or after the surgery and will send home pain medication with most of our surgeries.

		YES	NO
